

EX ANTE

OUR MISTAKE

It seems like we never fail to fail, at least once. This time the once comes from our Summer 2022 issue. This sentence on page 289 . . .

Tensions between the antagonists flare up over discreet policy issues such as the appropriate duration of IP rights and the scope of exceptions and limitations.

. . . should be adjusted to say:

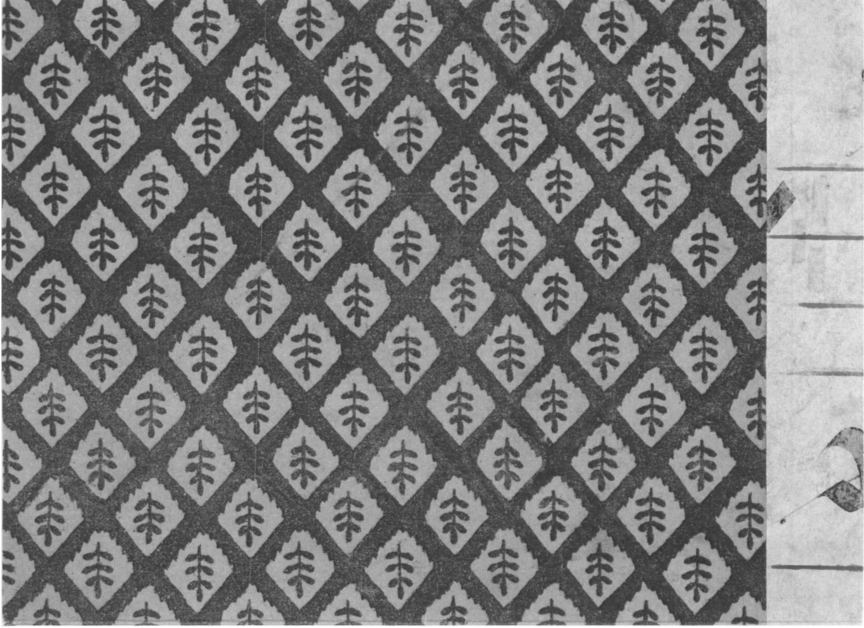

Tensions between the antagonists flare up over discrete policy issues such as the appropriate duration of IP rights and the scope of exceptions and limitations.

Did you spot our indiscretion?

Thank you, attentive reader Rachel Davies, for gently bringing yet another editorial stumble to our attention.

THE YALE LAW LIBRARY HOLIDAY CARD

Every year, Yale Law School's Lillian Goldman Law Library produces a lovely holiday card with an antique image on the front and a scholarly caption on the back. Both features of the 2023-24 edition are reproduced on the next page, in, alas, black and white.

Block-printed trees and a medieval manuscript music fragment wrap the 16th-century binding of this copy of the *Lectura super Clemintinis* by Peter of Ancarano (Venice: [Baptista de Tortis], ca. 1500).
